Restriction/Election

- 1. Restriction to one of the following inventions is required under 35 U.S.C. § 121:
- I. Claims 1-15, drawn to the method for fabrication microelectrodemechanic system mirror device, classified in class 438, subclass 734.
- II. Claims 16-22, drawn to the microelectrodemechanic system mirror device, classified in Class 359, subclass 290.

The inventions are distinct, each from the other because of the following reasons:

Each of the invention, I and II, recites limitations not recited in any of the other invention. The differing limitations make the inventions I and II patentably distinct from one another, i.e. a reference that anticipates or makes obvious one of the inventions I and II would not, by itself, anticipate or make obvious any of the remaining invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR1.48(b) and by the fee required under 37 CFR1.17(i).
